# TECHNOLOGY SCOTLAND ANNUAL DINNER

Technology Scotland is the representative body for Scotland's Enabling Technology Sector. Through our networks, **Photonics Scotland**, **MaaS Scotland**, and **Product Design Scotland**, we support a vibrant community of industrial and academic organisations who are developing technologies to deliver product advancements in markets from healthcare and communications to manufacturing and mobility.

The **Technology Scotland Annual Dinner** attracts a host of organisations from across our three primary networks, as well as friends and colleagues from the wider technology community. In recent years we have welcomed around **250 guests** from a diverse range of technologies and sectors, including significant representation from senior decision makers. With the sector and our membership growing year on year, we hope to break our record for attendees in 2023!

**The future for innovation in Scotland is bright.** Now is the time to align your organisation with this vibrant movement, ensure that your brand is visible at the highest level, and treat your colleagues to an evening of fun, celebration, and the opportunity to build their networks.

**ONE OF THE OLDEST  
PHOTONICS  
ORGANISATIONS  
IN THE WORLD**

**EUROPE'S  
LARGEST MOBILITY  
AS A SERVICE  
NETWORK**

**THE FOCAL POINT  
FOR SCOTLAND'S  
PRODUCT DESIGN  
SECTOR**

## PAST ANNUAL DINNER FEEDBACK

"The Technology Scotland dinner is always an excellent event, a highlight in the calendar, a must-do for the fabulous networking."

"This is a great annual event for the industry and one that many look forward to. Technology Scotland do a great job as always in making it a successful evening."

"I really enjoyed the event. It was very well organised and it was great to meet new companies that I had not met before...It brought together many key players from a traditionally difficult to engage community"

"I was able to meet with old and new connections, through mutual conversations before and after dinner as well as at the table which was mixed"
