

CATCHMENT AREAS

MAAS conference

Delivering inclusive economic growth

 Proposed Mobility Hubs
June 2023

E-Bike catchments
Based on average bike
speeds of 15.5km/ph

2 4 6 8 10 12

Who we are

**50-person team of Planners
Modellers Engineers Analysts &
Designers**

Typical projects

Mixed use masterplans
Stadium

Transport interchanges

Town centre regeneration / public realm

Individual buildings

Smart mobility research

Momentum is an integrated transport consultancy. We specialise in the study of transport and mobility in complex environments.

With offices in **London, Scotland, Ireland** and **Canada**, we work with urban and regional development stakeholders around the world to develop areas for the long term and to ensure the sustainability of the built environment.

MAAS + NTS 2 + Development planning

A type of service that, through a joint digital channel, enables users to plan, book, and pay for multiple types of mobility services (Wikipedia)

From personally owned modes towards public / shared / private through a unified gateway (also Wikipedia)

Helps Deliver Inclusive Economic Growth

Helps deliver inclusive economic growth

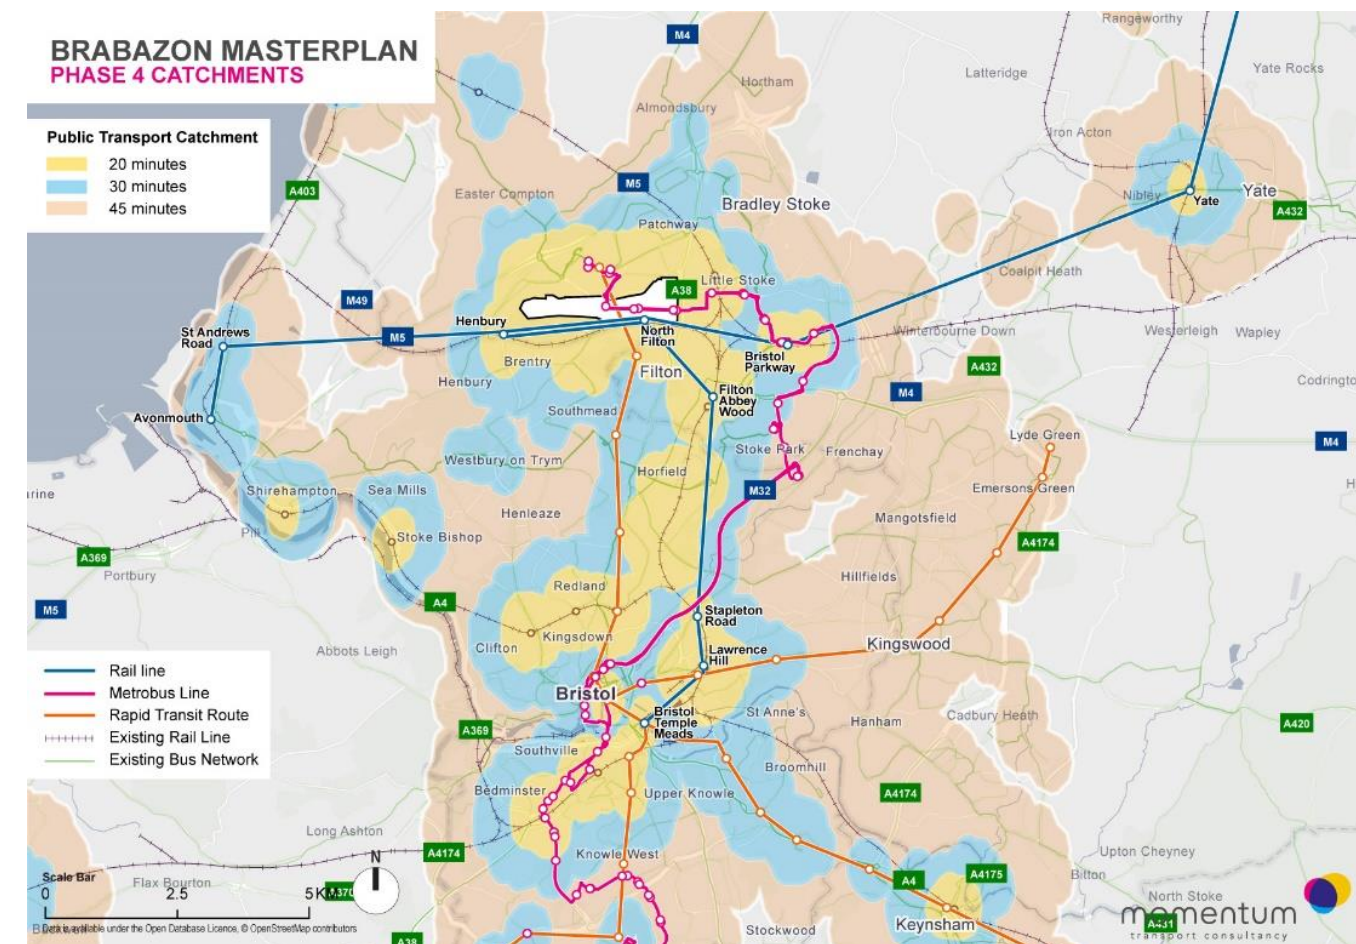

- Will get people and goods where they need to get to
- Will be reliable, efficient and high quality
- Will use beneficial innovation

New homes, new employment areas, new services and the physical / non physical infrastructure that binds them all

- Where does the stuff / people go (and is that in the right place?)
- How does it get there (and is that the best way?)
- Can everyone / everything go where they need to go?
- Are there new ways to solve old problems

When we look at new developments we go from very general e.g. land use allocation and spatial planning through to very specific e.g. detailed design of highways, phasing of occupation etc

- Where does MAAS fit (/does not) into this process?
- What are the consequences?
- What can be done?

Analysing future PT catchments for a large mixed use site in South Gloucestershire

Thank you
