

Critical Technologies - Emerging Leaders Programme

What you will develop:

- Strategic thinking and future-focused decision making
- Confidence to lead people through change
- Greater influence across teams and stakeholders
- Communication that engages different audiences
- Coaching skills to develop capability in others
- Resilience and confidence in more complex leadership situations

Additional content:

Commercial Awareness for Technical Leaders

- Use basic commercial language and key financial terms with confidence
- See how their own decisions, time and estimates affect project margin
- Ask better questions and raise commercial issues early

Storytelling, Influence and Pitching Technical Value

- Translate technical detail into clear, audience-friendly language
- Identify key stakeholder groups and tailor the message to each
- Deliver a short, structured pitch with peer feedback

Delivered in partnership with
Technology Scotland as part of the
Scottish Cluster Programme
